# Flavored Coffee Descriptions

## COFFEE PROGRAM

*The roasting process causes green coffee beans to expand and change in color, taste, smell and density to produce coffee's flavor characteristics.*

Time, temperature and type of coffee bean affect roast level and taste.

## Flavored

Flavored coffees are created by combining our superb New England Breakfast Blend with the finest flavorings. All our flavors are free of lactose and do not contain fat or cholesterol. They have just about the same caloric value as non-flavored - the difference is almost immeasurable.
