

At Avalon, we are committed to providing customers with an effortless hydration experience. In 2008, it became our mission to meticulously research and refine water coolers to make people's lives easier while also saving them money. We challenged the status quo and took a different approach to product design and manufacturing by including an abundance of health and safety features into our designs. We pride ourselves in only using the best materials and craftsmanship. Each water cooler is rigorously tested and held to the highest standards to ensure perfect water, every time.

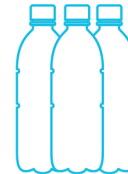

Benefits of switching to bottleless

No more lifting
or storing bottles

No delivery interruptions or
running out of water

No plastic waste;
environmentally friendly

No invoice fluctuation -
simply one flat rental fee
